

# Dexfield Park Airfield

100 Hursley Rd.  
Redbank NSW 2446.  
Phone: 0410 541 602 or 0400 34 1100

Identifier: YDFD  
Location: 31 25 20S 152 45 29E.  
5.5 nm due west of YPMQ.

Runways: 17/35, length 800m (fence to fence.)  
Surface: grass over clay and gravel.

Radio: use the Port Macquarie CTAF 118.1

Hazards: trees on approach, kangaroos on the strip, soft edges when wet.

## Notes:

The strip can be hard to see if you are not familiar with the area. There are cones marking the runway and two windsocks to look for. There is a silo about a mile north of the strip, and to the south the Rocks Ferry bridge and the adjacent large white house are good landmarks.

The northernmost 1/3 of the strip has a significant upslope, so preferred runway for landing is 35 and for takeoff is 17, subject to wind direction.

There are two windsocks - one near midfield on the eastern side, and one at the runway 35 threshold.

Parking is outside the hangar.

After rain the runway sides at the southern end can be soft. Keep to the centre (which has a hard base) and if landing on 17 go all the way to the hard turning circle at the end before doing a 180. Exit the runway to parking via the gravelled area.

## Noise abatement:

We have a few noise-sensitive neighbours.

Circuit height is 1000'; downwind leg for 35 should be on the western side of the railway line. No touch-and-goes or low-level circuits permitted.

Please avoid overflying the area west of the airstrip and east of the railway line if possible, and never below 1000'.

See the map on the next page.
